FOREWORD

The Haigh family have farmed Heath Lea since 1957. The farm has been centred around the milking herd with approximately one third of the milk being bottled on farm and sold through a local milk round as well as to shops and cafes. In recent times the farming operation has been jointly managed by brothers John, David & Peter. The dairy herd has been dispersed at the end of 2020 with the brothers having now taken the decision to split the farm partnership and sell the farm which brings about this most genuine of dispersal sales.
